

## Power BI Assessment

### **Objective**

The objective of this assessment is to create a report based on the learning outcomes of Power BI.

### **Scenario**

You work in the World Bank Development Indicators Sector as a Data Analyst. You are responsible for analysing economic performance, comparing GDP of countries, and predicting economic trends.

The data set includes information about GDP for various countries since 1961.

### **Task**

Your task is to analyse data and create report on Power BI.

In your analysis, you must demonstrate various appropriate visualisations and justify your choices.

You will have to present your report during one-to-one session.
